## **EXPERIENCE**

### Jack Jaffa & Associates, Brooklyn, New York

Feb. 2025 - Present

**Software Engineer** — Development & Solutions Team

- Delivered custom ASP/SQL tools powering inspection ops across multiple departments boosting efficiency, increasing on-time inspections by 30%, and streamlining reporting and invoicing workflows.
- Reengineered Classic ASP + ABCPDF reporting engine with modular architecture and query optimizations reducing runtimes by over 120% and enabling sub-30-second, customizable reports.
- Saved hours daily by automating a fault-tolerant vehicle-violation layer with Selenium scraping and reCAPTCHA v2 solving — enabling client workflows, API vehicle-data enrichment, low-API-credit alerts, and log/error-report emails.

#### **SDM Financial**, Brooklyn, New York

Jun. 2023 - Feb. 2025

**Derivatives Software Engineer / Analyst** — Derivatives and Spot Teams

- Built ETL pipelines on AWS EC2 to integrate real-time data from Deribit, ByBit, and Coinbase APIs, transforming it with Pandas and NumPy for seamless storage in PostgreSQL and Google Sheets.
- Implemented a Deribit trade alerting bot that boosted response times from 3-5 minutes to seconds, providing instant order status updates, reducing trade discrepancies by 35%, and increasing confidence in trade execution.
- Automated complex financial reporting workflows, reducing multi-hour processes to a one-click solution, saving 3,000+ hours annually by automating 50+ reporting workflows.

#### **J.P. Morgan Chase**, Manhattan, New York

Jan. 2023 - Feb. 2023

**Software Engineering Intern** — Data Analysis Team

- Leveraged AI tools to automate complex reporting workflows, deployed production-ready code via CI/CD pipelines, ensuring smooth functionality across all environments through automated testing and deployment reviews.
- Built an automated trade-performance email system comparing manual vs. software-managed trades.

#### **EDUCATION**

Hunter College, New York, NY Bachelor of Science in Computer Science May 2025 GPA: 3.54

Dean's List: Fall 2021, Spring 2024, Fall 2024

#### **PROJECTS**

Discord Reminder Bot — Python, MongoDB, AWS ECS, AWS CloudWatch, Git Actions, Docker July 2023 - Present

- Deployed a scalable Discord bot on AWS ECS with Docker, leveraging MongoDB for data storage and maintaining 99.9% uptime with 1,000+ daily users.
- Enhanced security and accelerated development cycles by integrating AWS Secrets Manager for secure credential management, implementing real-time monitoring with AWS CloudWatch, and automating testing and deployment through CI/CD pipelines with GitHub Actions, reducing incident response times by 60%.

MISK - Real-Time Stock News Platform — Python, Flask, PostgreSQL, React, TypeScript Jan. 2024 - Jul. 2024

- Developed a real-time stock news platform delivering instant financial insights to over 100 users, featuring LSTM-modeled price predictions and sentiment analysis, enhancing user trading decisions by 35%.
- Implemented an automated notification system providing brief summaries for subscribed users.

#### **SKILLS**

Python, Java, JavaScript, TypeScript, C#, .NET, C++, Swift, SwiftUI, UIKit Languages

Web HTML, CSS, React, ASP.NET, Vbscript, Webpack, Nodejs, JQuery, REST, Websockets, Flask

SQL, MySQL, PostgreSQL, SQL Workbench, MongoDB, AWS RDS, Heroku **Database** 

Jupyter, NumPy, Pandas, PyTorch, Matplotlib, Tableau, VSCode, PyCharm, CLI, AWS EC2/ECS Data Science/Tools

Others Git, OpenAI, Bash, Powershell, Cron, API, Linux, MacOS, Jira, Docker, Github Actions
